MARION HAS STREET LIGHTS

City Council and S. M. Jenkins Come to Agreement on Monday Night

The citizens of Marion are relieved of all anxiety of remaining in darkness. At the regular meeting of the City Council Monday night, November 6, the city entered into a contract with the Marion Electric Light, Water and Ice Company to furnish street lights from that date until six months after the date of a city light franchise, which it is expected, has passed its second reading before the City Council.

The city agreed to pay Mr. Jenkins \$200 per month during the life of the contract and the city agreed to erect the necessary poles and wires of the lights were possible, which together with the purchase price of the lights, for Mr. Jenkins to accept the proposition made him by the city.

The annual charge per hour for domestic purposes is not to exceed 10 cents and the meter of day service is left with Mr. Jenkins to arrange with his customers.

MISSING WORD

QUIETEST WINNERS

Following are the winners of the Marion-Maryland Word Contest which just closed last week.

First prize, Mr. J. H. Sumner, with correct answer.

Second prize, Dorothy Brewer with 19 correct answers.

Third prize, Ned Grooms with nine correct answers.

The two next scorers are Elizabeth Lee Hagans, 8; Georgia Helen Nance, 7; Grace Condit, 6; George McDonald, 5; Irene Hutchinson, 4; W. L. Terry, 3; Mary Thomas, 2; W. L. Adams, 1; Hodge, Mr. Harvey Lowry, and Vernon Hutchinson, with one each.

REBEL-RAID

Mr. and Mrs. A. T. Bells have received a card announcing the marriage of their son, Mr. Harry Bell, and Miss Olga Gentry, daughter of Mr. and Mrs. Franklin Gentry, of Dayton, N. J., which took place on October 28 at Church of Trinity, of that city.

FIRST BAPTIST CHURCH

Sunday, November 12.
Morning, 11:00 A. M., subject, God's House at State 7:30 P. M., Unity a Vow.

W. Y. P. I. Sunday, 7 P. M.
Class practice Friday 7:30 P. M.
Everybody is cordially invited to attend these services.

H. H. DUNCAN, Pastor

GRADED SCHOOL NOTES

In last month's notes we said that every student whose name appeared on the honor roll was an A student in everything. That was not a little misstatement to the school children and to the public. A student who makes an average grade anywhere in A is an honor student and his or her name is placed on the honor roll.

MARION HIGH LOSES TO STURGIS

Football Team Loses Game to Sturgis Friday Afternoon—Win From Central City Saturday

Marion met the ancient enemy, Sturgis, last Friday and succumbed to the tune of 14 to 0. The silent line and White warriors were very busy in holding the Sturgis score to two touchdowns in the first half because they played so handily and the back field was slow in getting into action when they had a chance on the offensive. Fumbles were the order of the day. Kickoffs were fumbled, forward passes were fumbled, but we are pleased that the Blue and White at least got rid of their season's epidemic of fumbles.

At the beginning of the second half after Sturgis had recovered a fumbled kickoff Marion showed the old time fight and held for down on their own ten yard line. Then began the spirited match up the field that attracted Sturgis' best rushing of the day. Wilson and Brown shot thru the line following the interference put up by Ballard until the ball was at Sturgis' three yard line at which place Marion lost the ball in a fumble. Again in the fourth quarter Marion started another march toward a touchdown, but the attack was checked for late and the game ended with the ball in Marion's possession at Sturgis' fifteen yard line.

Travis scored his usual consistent game at end, charging time after time and bringing down the man with the ball. The left side of the Sturgis line was very weak to the second half.

After their defeat at Sturgis last Friday the Blue and White visited Central City Saturday and trounced the high school team of that place by the score of 12 to 0. The tough contest was made by Ballard who was at fullback for part of the game and at quarter the rest of the game.

Look at the game Coach Brown coached several of the regulars and coached the second string men in their places. Winning the game on Saturday served to put more pep in the squad and great preparations are being made for the next game which is played at Henderson on November 18.

A conflict in the schedule made it necessary to play Sturgis on Friday and Central City on Saturday. Marion wants a game on November 18 which is an open date on their schedule.

HAVE A SMOKE?

Mr. S. H. Dalton of this city, has an exhibition at this office a tobacco pipe which is more than a century old, of strange workmanship and of historical interest. The pipe was picked up by a United States soldier 15 years ago in an old dug-out in Montana and has been in the possession of its present owner for five years. It is of genuine meerschaum and has an elaborate design, beautifully hand-carved on its bowl and in judgment to be of German origin. The pipe is 18 1/2 inches long, with a carved stem, the bowl being five inches around and three inches tall. It is in good condition for use, and if any of our readers desire to try it out, he is welcome to one smoke at home.

PETRIFIED HICKORY NUT

Mr. Naval Hagans brought to this office the other day a petrified hickory nut which, he reports, he found while working in the challenger spar mine, in this county, at a depth of 45 feet. It is of the large shell bark variety, the hull being separated from the inner part of the nut and both portions being in a state of petrification. It would take a geologist to determine the age of the nut.

SCHOOL DISTRICTS COMBINED

Owing to the scarcity of teachers, Sept. 1, L. E. Paris has combined the districts of Piney Fork and Belmont and Mr. Raymond Boucher will teach pupils of both districts at Piney Fork. Mr. B. F. Slaughter, teacher at Belmont, has been transferred to the Siro Chapel district.

LIGHT VOTE POLLED HERE

Barkley Carries County Over McChin, Republican in Congressional Race

A light vote was polled in Crittenden county at Tuesday's election. Complete returns from all the voting precincts in the county show about the same degree of apathy in each. In the First District Congressional race, Alfred W. Barkley, Democrat, carried the county over E. Marion McCain, Republican, by 50 votes. This is the first time Crittenden county has given a majority vote for a Democratic candidate for Congress. Herbert M. Morgan, D. C. Franklin and W. F. Cox were elected members of the City Board of Education without opposition.

Following is the final vote of the county in the Congressional race by precinct:

Precinct	Barkley	McCain
Marion No. 1	19	25
Marion No. 2	41	18
Marion No. 3	56	18
Marion No. 4	11	25
Marion No. 5	18	29
Marion No. 6	31	36
Marion No. 7	39	19
Central	14	16

BRIGHTMAN NEWSOM

Mr. Raymond Newsom, of the Marion section, and Miss Eva Brightman of the London section, were married at the home of the latter, Thursday, November 2, and were united in marriage at the parsonage of the First Baptist church, Rev. H. H. Duncan, performing the ceremony. They are both popular young people of their own town. Mr. and Mrs. Newsom left after the ceremony for a visit to friends at Glasgow, Ky.

BREAKS ARM IN FALL

While reading out for a paper on Thursday morning J. D. Aker, Jr., the ten year old son of Mr. and Mrs. J. D. Aker fell from his bed, breaking his left arm. The wound broke in two places. The wounds were dressed and he now carries the injured arm in a sling.

About five weeks ago, J. D., while playing with other boys on the station platform at the L. C. Depot, fell and broke the same arm in three places. Perhaps the wounds of the first accident had not entirely healed.

THE WOMANS CLUB

The Woman's Club was entertained by Mrs. Belle Brown, Wednesday afternoon, Nov. 1, in the Leavenworth. After the business meeting the following program was given: Chorus, "Gather 'Round, Old Time," Mrs. J. C. Henry.

Music, "The Home of Love," Mrs. J. C. Henry.

Music, "The Home of Love," Mrs. J. C. Henry.

Music, "The Home of Love," Mrs. J. C. Henry.

FOR SALE

Full blooded, single cock, Rhode Island Red, 1 year old, for sale, 75c each if taken at once.

MRS. HERSHEL U. FRANKLIN, Marion, Kentucky.

WILL CORAM DIES

Will Coram, formerly of this city, died at his home in Livingston county Tuesday, aged 69 years. Funeral services were conducted at Lay's chapel by Rev. W. T. Bakley. The deceased was a son of the late Sam Coram, a former jailer of this county. He is also a nephew of Mr. and Mrs. John West Lantz of this city.

OIL FOUND NEAR TOLU

After Several Months Work Driller Henson Strikes Crude Product at 900 Feet Depth

The oil prospect at Tolu, Ind., it is learned from reliable sources, has been an unbroken fact. Contractors Sam Hall and Driller A. G. Henson report that they have struck oil at a depth of a little less than 900 feet in the oil well being drilled near Tolu. There is no doubt, they assert, of the product being pure crude oil, but the quantity has not yet been ascertained. The water well has been pumped out and water put into the well before the quantity can be known.

If the quantity comes out to expect that this discovery will be a big thing for Tolu and Crittenden county. For several years persons who profess to be interested in such things have at their own expense been digging beneath the surface of Crittenden county, but it takes time and money to get after it.

One of the years ago a contract was made with Indianapolis, Ind., to drill a well at Tolu, and that of the oil field of Tolu. It is reported that it is the fact that some time ago he started off to make a survey of the land. It was then that he started the spot where this oil is being drilled. He told the people that there was oil there and that all they had to do to get it was to go after it. The well is located in the old Farm Order farm, and owned by W. L. Brown, and is about one-fourth mile from Tolu and a mile from the Ohio River.

IMPORTANT TO HOLDERS OF VICTORY NOTES

If you are a holder of one of the Victory Notes that were issued with the Government bonds, please let us hear from you. A lot of them are being lost and we will not draw interest after December 15.

If you will bring your note to Marion Bank we shall be glad to collect them for you. Two if you desire to keep the money at interest, we will not get it any time you want it, we will issue a new certificate of deposit.

Yours Truly,
T. J. YANDULL, Cashier.

FELL INTO CISTERN

The little two-year-old daughter of Mr. and Mrs. George W. Gans, residing a few miles from town, while playing in the yard a few days ago, fell into a cistern 21 feet deep and which contained six feet of water. The child was crushed in the fall and when she rose from the water, she caught hold of a projecting rock and held on to it while her mother called her father, Mr. Gans and a few friends rescued the little child before she was for the accident.

SECOND BAPTIST CHURCH

The series of revival meetings which began at the Second Baptist church Monday evening last continued, and the series, after a most interesting presentation of the gospel, by Rev. H. W. Egan, of Paducah, a strong revival of the Holy Spirit, Rev. H. W. Egan, of Paducah, a strong revival of the Holy Spirit, Rev. H. W. Egan, of Paducah, a strong revival of the Holy Spirit.

FAIRBANKS SPENCER

On Wednesday, October 25, at five o'clock P. M., Mr. John R. Spencer, of this city, and Miss Anne Fairbanks of Joliet, Ill., were united in marriage at the Fairbanks home in Joliet. It was a quiet home wedding. After the ceremony Mr. and Mrs. Spencer left for a short automobile trip through the West. They will be at home at Marion November 15.

FOR FEED The Grass place at Fredman, 30 acre farm, eight room house. Address J. H. NEILA, Princeton, Ky., Phone 375.

Mrs. J. A. Hagins and daughter, Miss Katherine, attended the ball game at Central City Saturday.

STILL CAPTURED LAST SATURDAY

Moonshine Still Found on Premises Of Talmage Hill Near Piney Fork, Last Saturday

On suspicion derived from previous information Sheriff J. T. Wright, Deputy P. R. Taylor and former County Attorney John A. Moore went Saturday to the home of Talmage Hill, who resides two miles from Piney Fork church, with a warrant to search the premises. Upon their arrival there Mr. Hill readily gave his permission to have his premises searched. In a barn near the house the officers discovered a still covered with sorghum fender, which they took possession of and brought to the court house in Marion. Mr. Hill, it is said, denied all knowledge of the still being on his premises. He is reported to have further said that it was evidently brought there by some one unknown to him on the night before while he was away from home fox hunting.

The still is of about 15 gallon capacity, is in good condition and seems to have been recently used. It is of copper throughout. The still is now at the court house and many persons have called to see it.

Farm Bureau Notes

The Forest Grove Community Unit will hold a school and community day on Armistice Day, Nov. 11. An extensive program list is provided. Let everybody come and have a general good time and get together on this fair day. Host the school and meet the community. Be glad you live in a day of peace. Bring your dinner and spend the day. The schools from which entries are expected are: Oak Hill, Brown, Freedom, Goodale, Calton, Hebron and Forest Grove.

With a change in the weather a number of Crittenden farmers will be thinking seriously of killing their winter meat. In line with this question Mr. H. G. Sellards from the Experiment Station will give several meat cutting and curing demonstrations on November 15 and 16th in various parts of the county. These will give some very helpful information and everyone in the neighborhood of a demonstration should make it a point to be present. The places cannot be announced at this time but any one interested can receive a list of the demonstrations Saturday at the County Agent's office in Marion.

Pure-bred Sires

Considerable time will be spent this coming week by the County Agent and the Assistant County Agent in pure-bred sire work.

Mr. Rhoads from the College of Agriculture has charge of this work in the state of Kentucky and he will be here to assist in the eradication of virus areas in this county. The work consists simply in getting a farmer to agree that he will use nothing but pure bred sires on the cattle, hogs, horses, sheep and chickens on his place. He is given a certificate that states he has agreed to do nothing but pure bred sires.

The purpose in view is the improvement of the principal classes of domestic livestock in Crittenden and other counties in the State. Most farmers believe that a good sire is better than a good dam. It is true, but a good sire will not give a good dam a good son and a good dam will not give a good sire a good son. The purpose of the program is to improve the quality of the stock and to give the farmer a better understanding of the value of a good sire.

Any farmer in the United States who keeps any kind of domestic live stock may take part in the campaign and be rewarded. It is for the best of the farmer who has more than a pig or two, poultry, as well as the ranch man or extensive live stock breeder. The enrollment of persons permanently engaged in raising live stock for market is especially desired.

Seed Corn Tests Complete

During the past season several varieties of seed corn have been tested in several sections of the county. The object of the test was to determine two or three of the best varieties of corn for the farmers of Crittenden.

D. H. FRANKS DIES IN CALIFORNIA

Former Crittenden County Citizen Passes Away at His Home in Los Angeles Last Friday

David Hodge Franks died at his home in Los Angeles Cal., at eleven o'clock Friday, Nov. 3, of tuberculosis, aged about 69 years. The remains will arrive here Saturday morning. Funeral services will be held at the First Baptist church Sunday at 2 o'clock, conducted by the pastor, Rev. H. H. Duncan. Interment immediately after at Maple View Cemetery, the burial services being in charge of the Masonic Lodge.

Mr. Franks was well known here and had many friends. He was a son of the late John Franks, one of the early settlers of this county. He was a member of the Baptist church and also a member of the Masonic Fraternity. About 20 years ago he left here with his family for Cripple Creek, Colo., where he lived until two years ago when he moved to California.

About thirty-five years ago he was married to Miss Julia Flannery, daughter of the late T. J. Flannery, who survives him. He is also survived by two sons, Ernest and Robert Franks, both of Los Angeles and by two brothers and four sisters, John T. Franks, of Denver, Colo.; E. T. Franks, of Owensboro; Mrs. Joel Farmer of Florida; Mrs. Addie Franks and Mrs. Tom Gill, of Texas; and Mrs. Will Hurley of this county.

A YOUNG ELECTRICIAN

Master Sidney Marshall Jenkins, the seven-year-old son of Mr. and Mrs. S. M. Jenkins, has proven himself to be a considerable electrician. When the family moved into their new home they needed the addition of a few more electric lights for the porch and out buildings and S. M. Jr. agreed to put them up. And he did, wiring the buildings and making all the necessary connections with the light plant.

MARRIED AT ELIZABETHTOWN

Miss Mary Elizabeth Kimsey, a daughter of A. C. Kimsey, of the Sheridan section, and Mr. Elmer Cornel of the same locality, went to Elizabethtown, Ill., Thursday of last week and were united in marriage, City Marshall Terrell performing the ceremony. Mr. Terry Robinson and Miss Emma Bell accompanied them. Mr. and Mrs. Cornel will make their home in Rosiclare.

A CARD OF THANKS

We desire to thank our many friends who so willingly assisted and helped us in the sad hours of affliction and death of our husband, father and grandfather. Neighbors and friends stood by us in the last and every way was done that could be done. May God's richest blessings rest on you and all.

MRS. ELLEN LOYD

J. P. Lloyd, Wife and Children

It is to be noted that the variety of corn seems to be very well adapted to the soil of this county while other varieties showed up very poorly in the demonstration.

Several new varieties in this county were shown by the County Agent last spring. These were planted by some of the same varieties. Last week this corn was harvested by the demonstrators who were assisted by the Assistant County Agent. Though they had not and wanted a fraction of an acre and then compared the yield per acre. In each test the corn was planted at the same time and grown on the same kind of ground and under identical conditions as far as possible. Needs yellow dent showed the highest yield of any variety, yielding 38.6 bushels per acre in one instance. In two tests it proved better than Boone County White. Gate Post proved to be one of the best local varieties, yielding 47.4 bushels against 48.2 for Needs Yellow Dent in the same test. Iowa Silver Mine and Pride of Saine and Hickory King also proved good yielding varieties.

FOWLS NEED OYSTER SHELLS

Failure to Provide Laying Hens With Proper Materials Is Sure to Cause Disaster

"Laying hens require oyster shells and limestone salts at all times as well as other essential materials," said Prof. J. H. Hays, of the University of Wisconsin, in a recent experiment.

This statement was based on an array of scientific data gathered from years of extensive work at the Wisconsin experimental station. The data showed that hens which were fed oyster shells and limestone salts produced a larger quantity of eggs than those which were not.

In order to get the most out of laying hens, it is important to provide them with the proper materials. This includes oyster shells and limestone salts, which are essential for the production of eggs.

BETTER PROGENY BY CULLING

Wise Plan to Demand All Fowls in Flock Except Most Vigorous and Profitable Layers

(Prepared by the United States Department of Agriculture)

That culling is the best method of getting rid of all those fowls which are of no use, and that it is the only way to secure a flock of the best quality, is a fact which is well known to all who are interested in poultry raising.

Single Comb Rhode Island Cocker.

These fowls are the best of the breed, and are the only ones which are worth keeping.

It is a fact which is well known to all who are interested in poultry raising, that culling is the best method of getting rid of all those fowls which are of no use, and that it is the only way to secure a flock of the best quality.

CHEAP POWDER FOR POULTRY

Mixture of Gypsum, Carbon Acid and Phosphor at Price of One Cent Each

A cheap and effective method of providing poultry with the necessary materials for the production of eggs is the use of a mixture of gypsum, carbon acid, and phosphor.

This mixture is a cheap and effective method of providing poultry with the necessary materials for the production of eggs. It is a fact which is well known to all who are interested in poultry raising.

PROVIDE WATER FOR CHICKS

Good Plan to Have Barrel Under a Shade Tree and Let It Drip Continually Into Pan

A good method of providing water for chicks is to have a barrel under a shade tree and let it drip continually into a pan. This is a cheap and effective method of providing water for chicks.

FEED AND CARE FOR PULLETS

Most Common Mistake to Give Fowls Free Range and Compel Them to Hustle for Living

When should an April pullet begin laying? Generally the statement is made that laying pullets should begin when five to five and one-half months old. If these birds are fed and cared for properly, they will begin laying at this age.

An investigation made by Purdue University developed the fact that many pullets are not laying at this age because they are not being fed properly.

The first mistake to be avoided is to give pullets free range and compel them to hustle for living.

In Addition to Free Range Pullets Should Be Given Plenty of Mash

In giving pullets free range, it is important to provide them with plenty of mash. This is a cheap and effective method of providing pullets with the necessary materials for the production of eggs.

KEEP YOUNG STOCK GROWING

Summed Green Feed Variety of Grain Fresh Water and Shade Are of Importance

So long as the young stock have plenty of green feed, a variety of grain, fresh water, and shade, they will grow and thrive. This is a fact which is well known to all who are interested in poultry raising.

A young stock which is given plenty of green feed, a variety of grain, fresh water, and shade, will grow and thrive. This is a fact which is well known to all who are interested in poultry raising.

MATURE CHICKENS ON RANGE

Good Summer Ration for Hens to Mix of Wheat, Oats and Corn, One Part Each

For mature chickens on range, a good summer ration is a mixture of wheat, oats, and corn, one part each. This is a cheap and effective method of providing mature chickens with the necessary materials for the production of eggs.

POULTRY NOTES

Continued from the first page. The following are some of the notes from the poultry section.

A young stock which is given plenty of green feed, a variety of grain, fresh water, and shade, will grow and thrive. This is a fact which is well known to all who are interested in poultry raising.

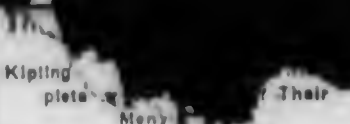

It is a fact which is well known to all who are interested in poultry raising, that culling is the best method of getting rid of all those fowls which are of no use, and that it is the only way to secure a flock of the best quality.

Is not make the mistake of feeding too much in the early stages of the feeding process. It is important to provide the young stock with the necessary materials for the production of eggs.

Stock is one of the most important factors in the production of eggs. It is a fact which is well known to all who are interested in poultry raising.

A good method of providing water for chicks is to have a barrel under a shade tree and let it drip continually into a pan. This is a cheap and effective method of providing water for chicks.

LIMIT TO USE OF MOLASSES

Test Made by Department of Agriculture in Co-Operation With Alabama Station

(Prepared by the United States Department of Agriculture)

That there is a limit to the quantity of molasses which can be added to a ration of 50 pounds of cottonseed meal and 50 pounds of corn silage for fattening yearling steers was shown in a test made by the United States Department of Agriculture in co-operation with the Alabama station.

Two lots of nine yearling steers were fed for 112 days. Forty-six pounds of silage per steer per day was practically the limit of their capacity. Lot 1 was fed 40 pounds of molasses per steer daily, while lot 2 was fed 80 pounds of molasses per steer daily. As lot 1 gained 240 pounds per steer daily, while lot 2 gained only 211 pounds per steer daily, it is evident that 40 pounds of molasses was the limit of their capacity.

Mr. and Mrs. H. H. Hays, of the Alabama station, were in charge of the test. They found that the steers which were fed 40 pounds of molasses per steer daily gained more weight than those which were fed 80 pounds of molasses per steer daily.

SMALL BOY'S PLAN WORKED

Whole Lot Better Than Keeping Constant Watch for Marauding Band of Chickens

When Frank Wehner, a small boy, saw his father's chickens being marauded by a band of chickens, he decided to take action. He found that the chickens were eating the corn which his father had planted in the field.

He decided to take action. He found that the chickens were eating the corn which his father had planted in the field. He decided to take action. He found that the chickens were eating the corn which his father had planted in the field.

ROOTING NATURAL FOR HOGS

While It Probably Helps Make Mucosa It Is Otherwise of No Particular Benefit

Why do hogs root? Will rings or other means of prevention have any detrimental effect on the health and progress of the animal? Experts at the National Institute of Agriculture say that rooting is just one of the natural propensities of hogs.

While it probably helps make mucosa, it is otherwise of no particular benefit. The fact that hogs root is a strong tendency to dig up alfalfa fields of their own free will.

There is no reason why rings should not be used where hogs do material damage rooting. The fact that hogs root is a strong tendency to dig up alfalfa fields of their own free will.

EFFICIENCY OF WORK HORSE

One of Chief Factors During Hot Weather Is Quantity and Quality of Food Received

One of the factors that materially affects the efficiency of the work horse is the quantity and quality of food received. This is a fact which is well known to all who are interested in the care of work horses.

The quantity and quality of food received is one of the chief factors during hot weather. This is a fact which is well known to all who are interested in the care of work horses.

Frozen Eggs All Right

They are as good as fresh. No one can tell the difference between fresh and frozen eggs. This is a fact which is well known to all who are interested in the care of eggs.

They are as good as fresh. No one can tell the difference between fresh and frozen eggs. This is a fact which is well known to all who are interested in the care of eggs.

Unless Humanity Changes

"To a man that the turkey is the most important animal in the world, and that it is the only animal which is not a bird, is a fact which is well known to all who are interested in the care of turkeys."

"I don't know," replied Senator Norcross. "I am afraid there will always be people who want to work without paying for it, and other people who will want to work without being paid."
